**Subject:** Comanche Station Alternate Source Determination for SSI at a landfill well  
**Date:** Wednesday, June 29, 2022 1:55:00 PM

---

We have reviewed the Alternate Source Determination for the landfill, described in the August 24, 2021 memo which was posted on your CCR website. We agree with the conclusion that the SSI for calcium in monitoring well MW-4B was not related to the landfill and that it is appropriate that detection monitoring continue for the landfill CCR unit.
